

Ahmad Raza Shibli

Working Student

Master's student in Applied CS at Georg-August Universität Göttingen specializing in software development, ML, and freelance projects. Proficient in Python and C++, and passionate about video editing, reading, and traveling.

EDUCATION

Masters In Applied Computer Science University of Göttingen

04/2024 - Present

Göttingen, Germany

Bachelors in Computer Applications Aligarh Muslim University

08/2020 - 07/2023

Aligarh, India

PERSONAL PROJECTS

Driver Drowsiness Detection System (02/2023 - 02/2023)

- Co-developed a Driver Drowsiness Detection System using OpenCV and Pygame. Implemented **real-time eye monitoring, customizable alert** thresholds, and automated audio alerts with an intuitive user interface.

SMART (Student Management and Retention Technology) (09/2022 - 11/2022)

- Developed a **LAMP-based web application** to manage the **complete student lifecycle**, from admission to alumni transition. **Integrated Arduino-powered** dynamic timetables, course selection, study material access, and responsive UI design using Tailwind CSS.

WORK EXPERIENCE

Software Developer Göttingen Digital Academy

10/2025 - Present

Göttingen, Germany

Achievements/Tasks

- Contributed to the **digitalization of historical papal charters** by **implementing geocoding** features and **optimizing database filtering and query** performance for efficient archival data management and visualization.
- Developed **LiMoST**, a modernized end-to-end web interface for the *Motiv-, Stoff- und Themenbibliographie* system, **improving the original** 2002 platform through enhanced UI/UX, frontend integration, and streamlined user navigation.

Web Lead SS AMU SAT

10/2023 - 05/2024

Aligarh, India

Achievements/Tasks

- Led end-to-end development** of satellite operations software, including backend systems, database design, and responsive front-end interfaces using modern web technologies.
- Built **secure and optimized systems** for telemetry and mission-control data management, while collaborating with interdisciplinary teams to integrate software with satellite hardware and ground systems.

SKILLS

Languages: Python, C++, Java, Bash(Linux)

Databases: MySQL, PostgreSQL, MongoDB, Firebase.

Machine Learning/Deep Learning: NumPy, Terraform, OpenCV.

Frontend: React, Tailwind, JavaScript, Material UI, Redux.

Backend: Laravel, JS, Flask, PHP.

Version Control and Automation: Git, n8n.

IoT: Arduino, Raspberry Pi, ESP32, Hailo-8L.

Cloud: Google Cloud, Heroku.

PUBLICATIONS

Diagnosing coronaviruses (COVID-19) using machine learning.

Machine Learning-Based Predictive Modeling of Student Counseling Gratification: A Case Study of AMU.

A Novel Approach to Key Exchange: Dual-Secured Diffie-Hellman with RSA Integration.

Ubiquitous Computing with Radio Frequency Identification Tags.

ORGANIZATIONS

Google Students Developer Club (04/2021 - 10/2024)

Organized and mentored multiple technical events, serving in leadership roles including ML Lead and Mentor during the final year.

CERTIFICATES

Python for Data Science, AI & Development | IBM

Developing AI Applications with Python and Flask | IBM
